About Us

Here at Trust 3rd Eye Security PVT. LTD., we are committed to provide you the highest level of safety possible for your digital life.

At the beginning of our journey, we came to the realisation that as technology continues to advance, it is more important than ever before to take measures to protect the confidentiality of our particular and sensitive information.

Our Mission

Our goal is to equip individuals and businesses with the tools necessary to safeguard their technologies, data, and privacy in a world that is becoming increasingly interconnected. This purpose is both straightforward and powerful. We are of the opinion that everyone should be able to enjoy the sense of tranquilly that comes from being aware that their digital assets are protected from dangers.

Our Values

Every part of our work is shaped by a set of fundamental values that serve as our guide:

- **Innovation:** We work tirelessly to create innovative solutions that outpace new dangers.
- **Security:** The foundation of all we do is security. We are dedicated to giving our users the best possible protection.
- **User-Centric:** Our users come first in all we do. We consider their wants, preferences, and worries when designing our software.
- **Trust:** We are aware of the critical role trust plays in security. Our goal is to gain and keep our users' trust by being trustworthy and transparent.

Our app provides a wide feature set that addresses a range of security issues, including data protection and theft prevention.

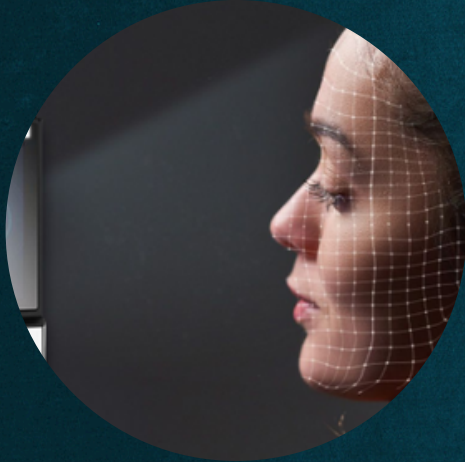

We take advantage of the most recent technological developments to make sure our software stays at the forefront of security innovation.

Why Trust3rd Eye ?

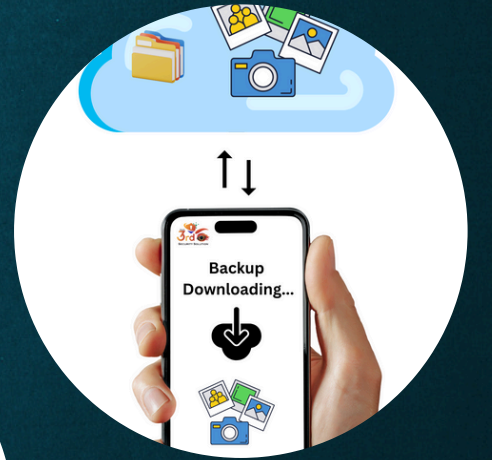

Despite the complexity of security, our app's design prioritises simplicity, enabling users to easily and effectively defend themselves.

Our history of happy customers speaks for itself. We have effectively safeguarded innumerable gadgets and information.

Features of Trust3rdeye

Anti Theft Alarm

The "Anti-Theft Alarm" feature is your device's first line of defense against theft and unauthorized access. With this feature, your mobile device becomes more secure than ever before.

Track Your Children

Our advanced child tracking technology gives parents peace of mind in today's fast-paced world. Our programme lets parents monitor their kids in real time, ensuring their safety. The app's GPS lets parents track kids at school, friends' houses, and anywhere else.

Women Safety

This thorough woman safety feature empowers and protects consumers. A simple Emergency SOS Button rapidly alerts pre-selected contacts or emergency agencies. If a scheduled check-in is missed, trustworthy contacts receive a Check-In alert and can track the user via real-time location sharing.

Security Lock

We prevent unauthorized access, often used in doors, gates, cabinets, and safes. The purpose of a security lock is to protect valuables, information, or spaces by restricting entry only to those who have the proper means of access, like keys, codes, or biometric data.

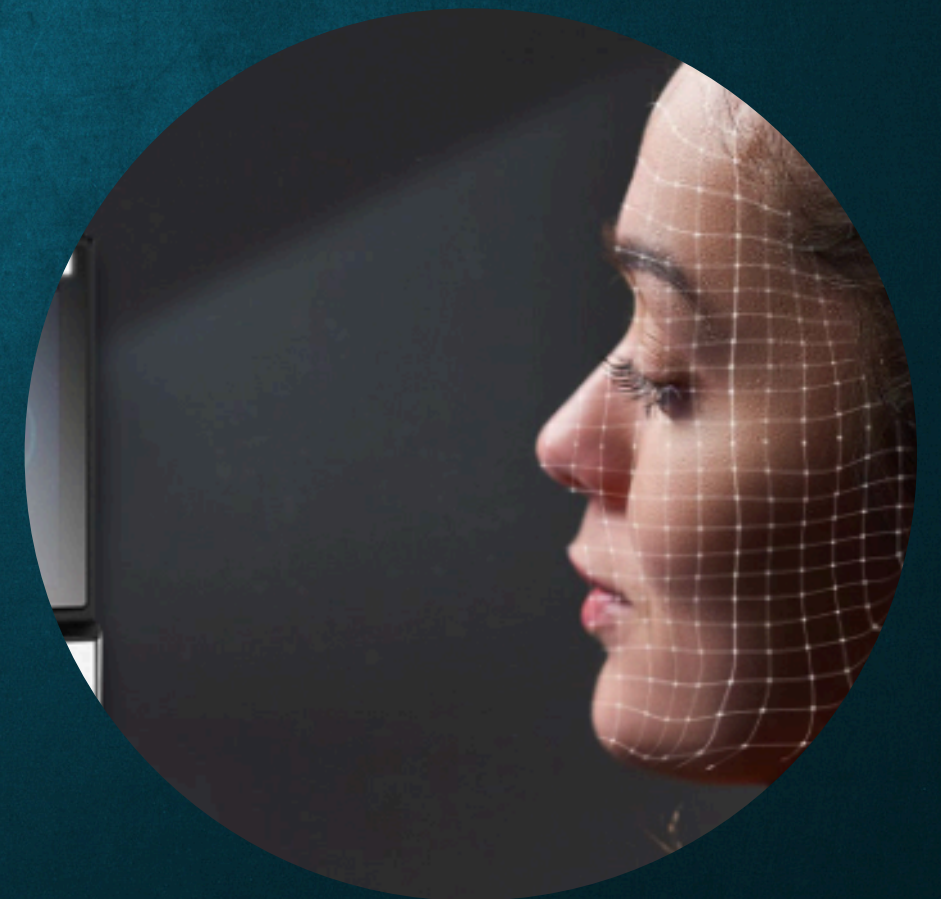

Security Alarm

Our security alarm is a system designed to detect unauthorized access or other suspicious activities and alert individuals or authorities about potential security breaches. We have various kind of alarm including Fire alarm, Carbon monoxide alarm, medical alert alarm, monitered & unmonitered alarm and more.

Picture Identity

Our biometric authentication systems that use facial recognition technology to verify the identity of a person. Instead of using traditional passwords, PINs, or patterns, face passwords rely on unique facial features to unlock devices, access accounts, or grant permission to perform certain actions.

Hide Your **App**

We offer a "Hide App" feature that allows you to conceal selected apps on your device, ensuring privacy and security. This feature helps keep your apps discreet and protected from unauthorized access.

Live **Location**

Our Live location feature allow users to share & track real-time location information with others for personal safety, convenience, etc. Our features are widely available on phones and through various apps, providing dynamic, upto-the-minute location updates to trusted contacts or services.

Camera Trap

The "Camera Trap" feature is a cutting-edge security solution that transforms your mobile device into a vigilant watchman. With this feature, you have the power to catch unauthorized access and intrusion attempts in the act.

Charging Remove

This innovative functionality provides users with real-time alerts and notifications when their device is fully charged, prompting them to remove it from the power source. This not only prevents overcharging, a common cause of battery degradation, but also promotes energy efficiency and reduces electricity consumption.

Data **Safety**

In the digital age, our smartphones hold countless memories in the form of contacts, messages, and more. To ensure the safety of your valuable data, the "Backup and Restore" feature offers a seamless solution to store and recover your information with ease.

SIM card **Lock**

Our SIM card lock is a simple and effective way to secure your mobile services and data by requiring a PIN code to access the SIM. It's a great feature to enable if you want to protect your phone from unauthorized usage and ensure your personal information remains safe.

AntiVirus

Antivirus software protects your device from malware and online threats, offering real-time scanning and removal. Free options provide basic protection, while paid versions offer more comprehensive security. Combining antivirus with good security practices ensures better protection.
